## ABOUT ME

I am a self-motivated, energetic, and ambitious person who has developed a mature and responsible approach to any task that undertake, or situation that I am presented with. I am eager to apply my knowledge and contribute to innovative projects. My adaptability, teamwork, and attention to detail make me a valuable asset in the field of software development.

## PROJECTS

### iBuy Tech(Custom PCBuilder)

The iBuy Tech Custom PC Builder website is developed using HTML and CSS, offering a structured and visually appealing interface. It showcases the core features of a custom PC building experience, highlighting clarity in layout and design without dynamic interactivity

### Serendip Waves(frontend)

2024 - Apr

The Serendip Waves frontend is built using React JS, Bootstrap, and CSS, offering a modern and intuitive user interface. It delivers a clean and organized layout that enhances user experience while effectively presenting the platform's features and functionality.

2025 - Jun

### Serendip Waves(Backend)

The Serendip Waves backend is developed using core PHP and is primarily responsible for handling cruise bookings, managing itineraries, and overseeing cruise details, ensuring smooth data flow and reliable server-side operations

2025- Jul
